

BITCOIN APPS SPECIFIC TOKENS

Revenue-Sharing Token Model for Bitcoin Apps Ecosystem

\$bWriter • \$bVideo • \$bMusic • \$bSheets • +11 More App Tokens

Bitcoin Corporation Ltd

Version 1.0 - November 24, 2025

EXECUTIVE SUMMARY

Each Bitcoin App operates as an independent revenue-generating business with its own app-specific token. \$bWriter captures Bitcoin Writer revenue, \$bVideo captures Bitcoin Video revenue, \$bMusic captures Bitcoin Music revenue, etc. All revenue from Market Pages (NFT trading) and Exchange Pages (.ft token trading) is distributed quarterly as dividends to holders of the specific app token, creating direct investment exposure to individual app performance.

TOKEN ECONOMICS MODEL

App-Specific Revenue Capture

Each Bitcoin App has its own dedicated token that captures 100% of revenue generated within that app. Market Page revenue from NFT trading, Exchange Page revenue from .ft token trading, premium subscription fees, and advertising revenue all flow directly to the app token dividend pool for quarterly distribution to token holders.

Token Supply & Distribution

App Token	Total Supply	Public Sale	Team/Development	Ecosystem Growth	Treasury
\$bWriter	1,000,000	40% (400K)	20% (200K)	25% (250K)	15% (150K)
\$bVideo	1,000,000	40% (400K)	20% (200K)	25% (250K)	15% (150K)
\$bMusic	1,000,000	40% (400K)	20% (200K)	25% (250K)	15% (150K)
\$bSheets	1,000,000				
All Apps	Standard distribution model across all 15+ Bitcoin Apps				

Revenue Flow Architecture

App revenue flows directly from source to token holders without dilution. Market Page NFT sales generate 5% commission → app token dividend pool. Exchange Page .ft token trading generates 0.25% fee → app token dividend pool. Premium subscriptions → app token dividend pool. This creates transparent, direct correlation between app success and token holder returns.

INDIVIDUAL APP TOKEN PROFILES

\$bWriter - Bitcoin Writer Token

Captures revenue from document creation, editing, and publishing platform. Revenue sources include NFT marketplace for document trading, .ft token exchange for document revenue shares, premium writing tools subscriptions, and professional publishing services. Target market: writers, journalists, content creators, publishing professionals.

\$bVideo - Bitcoin Video Token

Captures revenue from video creation, editing, and distribution platform. Revenue sources include NFT marketplace for video trading, .ft token exchange for video revenue shares, premium video editing tools, and distribution partnerships. Target market: filmmakers, content creators, video professionals, streaming platforms.

\$bMusic - Bitcoin Music Token

Captures revenue from music creation, production, and distribution platform. Revenue sources include NFT marketplace for music trading, .ft token exchange for music royalty shares, premium production tools, and licensing services. Target market: musicians, producers, record labels, music licensing professionals.

\$bSheets - Bitcoin Spreadsheets Token

Captures revenue from spreadsheet creation, data analysis, and financial modeling platform. Revenue sources include NFT marketplace for spreadsheet trading, .ft token exchange for data revenue shares, premium analytical tools, and financial modeling services. Target market: analysts, accountants, financial professionals, data scientists.

COMPLETE BITCOIN APPS TOKEN ECOSYSTEM

App Token	Application	Primary Revenue Sources	Target Market
\$bWriter	Bitcoin Writer	Document NFTs, writing tools, publishing	Writers, journalists, publishers
\$bVideo	Bitcoin Video	Video NFTs, editing tools, distribution	Filmmakers, content creators
\$bMusic	Bitcoin Music	Music NFTs, production tools, licensing	Musicians, producers, labels
\$bSheets	Bitcoin Spreadsheets	Data NFTs, analytics, modeling tools	Analysts, accountants, scientists
\$bEmail	Bitcoin Email	Email NFTs, premium features, encryption	Professionals, enterprises
\$bDrive	Bitcoin Drive	Storage NFTs, file sharing, collaboration	Businesses, teams, individuals
\$bChat	Bitcoin Chat	Message NFTs, premium features, channels	Communities, businesses
\$bMaps	Bitcoin Maps	Location NFTs, routing, local services	Travelers, businesses, logistics
\$bShop	Bitcoin Shop	Product NFTs, e-commerce, marketplace	Retailers, entrepreneurs
\$bGames	Bitcoin Games	Game NFTs, in-game assets, development	Gamers, developers, studios
\$bBooks	Bitcoin Books	Book NFTs, publishing, reading tools	Authors, readers, publishers
\$bNews	Bitcoin News	Article NFTs, subscriptions, journalism	Journalists, media, readers
\$bCode	Bitcoin Code	Code NFTs, repositories, development	Developers, companies, open source
\$bDesign	Bitcoin Design	Design NFTs, tools, collaboration	Designers, agencies, freelancers
\$bHealth	Bitcoin Health	Health NFTs, data, telemedicine	Patients, providers, researchers

FINANCIAL PROJECTIONS & DIVIDEND YIELDS

Combined Revenue Streams Per App

Revenue Source	Year 1	Year 2	Year 3	Year 4	Year 5
Market Page Revenue	\$15K	\$125K	\$875K	\$4.5M	\$18.75M
Exchange Page Revenue	\$3K	\$45K	\$450K	\$2.55M	\$12M
Total App Revenue	\$18K	\$170K	\$1.325M	\$7.05M	\$30.75M
Quarterly Dividend per Token	\$0.0045	\$0.0425	\$0.331	\$1.763	\$7.688
Annual Dividend Yield (at \$10)	1.8%	6.8%	52.9%	281%	1,228%

Portfolio Investment Strategies

- Diversified Portfolio: Equal holdings across all 15 app tokens for balanced ecosystem exposure
- Sector Focus: Concentrate in content creation apps (\$bWriter, \$bVideo, \$bMusic) for creator economy exposure
- Utility Focus: Target productivity apps (\$bSheets, \$bEmail, \$bDrive) for business adoption exposure
- Growth Strategy: Early investment in newer apps for maximum upside potential and dividend growth
- Conservative Strategy: Focus on established apps with proven revenue streams and stable dividends
- Arbitrage Strategy: Exploit valuation differences between similar apps across different verticals

INVESTMENT ANALYSIS & VALUATION

Revenue Multiple Analysis

At Year 5 projections, each app generates \$30.75M annually. Using conservative 10x revenue multiples common in SaaS businesses, each app represents \$307.5M in enterprise value. With 1M tokens per app, this suggests \$307.50 per token fundamental value, representing 30x return from initial \$10 pricing for successful apps.

Dividend Yield Analysis

Year 5 dividend yields exceed 1,200% annually on initial \$10 investment, demonstrating powerful compounding effects of ecosystem growth. Early investors benefit from both capital appreciation as apps scale and increasing dividend streams as revenue grows exponentially.

Market Opportunity by Vertical

App Category	Global Market Size	Target Capture	Revenue Potential
Content Creation	\$104B creator economy	0.5%	\$520M
Productivity Tools	\$45B office software	1%	\$450M
Communication	\$30B messaging/email	0.75%	\$225M
Entertainment	\$200B gaming/media	0.25%	\$500M
E-commerce	\$4.2T global retail	0.01%	\$420M
Total Addressable	\$4.579T combined	0.045%	\$2.115B

TOKEN TRADING & LIQUIDITY

Primary Distribution

Initial token distribution occurs through private sales to accredited investors and strategic partners. 40% public allocation enables broad participation while maintaining regulatory compliance. Team tokens vest over 4 years to ensure long-term commitment and alignment with token holder interests.

Secondary Market Trading

App tokens trade on the \$bEx central exchange, enabling portfolio construction and rebalancing across the entire Bitcoin Apps ecosystem. Cross-app arbitrage opportunities, sector rotation strategies, and diversified ecosystem exposure create sophisticated trading opportunities for institutional and retail investors.

Governance & Voting Rights

App token holders participate in governance decisions for their specific app: feature development priorities, revenue sharing adjustments, partnership approvals, and ecosystem integration strategies. Voting weight is proportional to token holdings, ensuring major stakeholders have appropriate influence over app direction.

Ecosystem Network Effects

App tokens benefit from powerful ecosystem network effects. Successful apps drive adoption of others through user crossover, integrated workflows create value across multiple apps, and the \$bEx exchange enables sophisticated investment strategies. Total ecosystem revenue of \$460M+ by Year 5 creates substantial value for early token holders across all apps.

RISK FACTORS & CONSIDERATIONS

Investment Risks

- App adoption may vary significantly, creating winners and losers among app tokens
- Regulatory changes in digital assets could impact token trading and dividend distribution
- Competition from established platforms may limit user acquisition and revenue growth
- Technical challenges in blockchain scaling may affect user experience and adoption
- Market volatility in cryptocurrency may impact token valuations and trading activity
- Creator economy trends may shift away from Bitcoin-based platforms
- Revenue projections are estimates and actual results may differ materially

Mitigation Strategies

Diversified app portfolio reduces single-app risk, strong technical team ensures platform reliability, regulatory compliance framework protects against regulatory changes, and conservative financial projections provide margin of safety. The integrated ecosystem approach creates multiple revenue streams and network effects that support long-term value creation.
