1. INVESTMENT SUMMARY

Bitcoin Corporation Ltd is a UK-registered technology company developing innovative Bitcoin-native software applications on the Bitcoin SV (BSV) blockchain. Our mission is to create the next generation of productivity tools, developer tools, and infrastructure applications that leverage the unique capabilities of Bitcoin's original protocol.

We are pioneering the development of Bitcoin OS, a comprehensive web-based operating system that provides users with native Bitcoin applications including email, storage, data management, and productivity tools. Our platform represents the first complete ecosystem built specifically for Bitcoin SV, offering unprecedented integration and functionality.

2. COMPANY OVERVIEW

Company Details

Company Name:	Bitcoin Corporation Ltd
Registration:	UK Company
Industry:	Blockchain Technology
Founded:	2025
Focus:	Bitcoin SV Software Development
Target Market:	Global Bitcoin Users & Developers

3. MANAGEMENT

Bitcoin Corporation Ltd is currently managed by a sole director and founder who brings extensive experience in Bitcoin technology and software development. The company operates with a lean, focused structure designed for rapid development and deployment of Bitcoin-native applications.

Founder & Managing Director

The founder serves as the sole director and is responsible for all strategic decisions, product development, and operational management. This structure allows for rapid decision-making and maintains clear accountability for company performance and investor returns.

4. PRODUCT PORTFOLIO

Bitcoin OS

Our flagship product is Bitcoin OS, a revolutionary web-based operating system that runs entirely on Bitcoin SV. It includes an integrated wallet, app store, and development environment, targeting developers and Bitcoin enthusiasts who want native blockchain functionality in their daily computing experience.

Bitcoin Exchange (bEx)

A centralized trading platform for tokens and digital assets created within the Bitcoin Apps ecosystem. The bEx enables users to trade assets generated by Bitcoin Apps such as spreadsheet tokens, document shares, and other digital assets created through our application suite.

Bitcoin Wallet

Next-generation wallet solution with comprehensive digital asset management capabilities, designed for both individual users and developers. Features include advanced security, multi-asset support, and seamless integration with our broader development ecosystem.

Bitcoin Apps Suite

A comprehensive suite of 15+ productivity applications including Bitcoin Email, Bitcoin Drive, Bitcoin Writer, and more. These applications are specifically designed for businesses and content creators who want to leverage Bitcoin's capabilities for their daily productivity needs.

5. USE OF PROCEEDS

Funds raised from this securities offering will be allocated to support the development and scaling of Bitcoin Corporation Ltd's core technology platform and product suite. The following budget outline demonstrates our commitment to responsible capital deployment:

Allocation	Percentage	Purpose
Software Development	60%	Core platform development and Bitcoin OS enhancement
Infrastructure	20%	Server capacity, blockchain infrastructure and security
Marketing & User Acquisition	10%	User growth, market expansion and partnerships
Operations & Administration	7%	Legal, compliance and administrative costs
Working Capital Reserve	3%	Contingency fund for unexpected opportunities

The majority of funds will be directed toward software development to accelerate our roadmap and maintain our technological leadership in Bitcoin-native applications. Infrastructure investment ensures scalability as user adoption grows.

6. TOKEN STRUCTURE & MULTI-SIGNATURE SECURITY

Token Issuance and Control

All tokens issued by Bitcoin Corporation Ltd are held in multi-signature wallets controlled by the company. This structure ensures that tokens cannot trade freely in secondary markets and provides enhanced security and regulatory compliance for our investors.

Multi-Signature Implementation

Our multi-signature system requires multiple authorized signatures for any token transfers or distributions. This prevents unauthorized token movements and ensures that all token-related activities are subject to proper corporate governance and regulatory compliance procedures.

Investor Protection

The multi-sig structure protects investors by ensuring tokens can only be distributed according to proper legal and regulatory frameworks. This prevents tokens from entering unregulated secondary markets and maintains compliance with securities regulations.

7. REGULATORY COMPLIANCE

Securities Compliance

Bitcoin Corporation Ltd operates within established legal frameworks and does not engage in activities that circumvent financial regulations. Our token offerings are structured as securities and are offered only to accredited investors under appropriate regulatory exemptions.

UK Company Law Compliance

As a UK-registered company, Bitcoin Corporation Ltd complies with all applicable UK company law requirements, including proper corporate governance, director responsibilities, and shareholder protections. The company maintains appropriate corporate records and follows established business practices.

Technology Compliance

Our software development activities comply with applicable technology and data protection regulations. We do not develop or promote technologies designed to circumvent legal or regulatory requirements, and our Bitcoin-native applications operate within established blockchain technology frameworks.

8. RISK FACTORS

Potential investors should carefully consider the following risk factors:

- Technology dependency on Bitcoin SV blockchain infrastructure
- Cryptocurrency market volatility affecting user adoption
- Regulatory changes in digital asset and blockchain sectors
- Competition from established software and technology providers
- Market acceptance of Bitcoin SV versus other blockchain platforms
- Technical challenges in scaling blockchain-based applications

9. LEGAL INFORMATION

Securities Offering Disclaimers

This document constitutes a private placement memorandum for securities offered to accredited investors only. This offering has not been registered with the Securities and Exchange Commission or other regulatory authorities and relies on appropriate exemptions from registration requirements.

Investment in Bitcoin Corporation Ltd securities involves significant risk and may result in partial or total loss of investment. These securities are illiquid and may not be transferred without compliance with applicable securities laws. Prospective investors must be accredited investors and should conduct their own due diligence.

Forward-Looking Statements

This prospectus contains forward-looking statements regarding future business plans, technology development, and market opportunities. Such statements involve risks and uncertainties, and actual results may differ materially from those projected. Investors should not rely solely on forward-looking statements when making investment decisions.

Company Registration

Bitcoin Corporation Ltd is registered in the United Kingdom and operates under UK company law. All business activities are conducted in compliance with applicable regulations and industry standards.
