

.ft TOKEN CONTAINERS

Dividend & Royalty Token Minting Platform

Financial Tokenization Specification & Investment Model

Bitcoin Corporation Ltd

Version 1.0 - November 24, 2025

EXECUTIVE SUMMARY

.ft Token Containers enable creators to mint dividend-bearing shares and royalty tokens from their Work NFTs, creating sophisticated investment vehicles and secondary markets. Investors can purchase tokens representing fractional ownership in revenue streams from digital work products, enabling new forms of creator financing and investor returns.

WHAT ARE .ft TOKEN CONTAINERS?

The Concept

.ft Token Containers allow creators to "financialize" their Work NFTs by minting tokens that represent ownership stakes in the revenue streams generated by their digital work. These tokens function as securities, providing investors with returns based on the performance and usage of the underlying work products.

Token Types & Structures

Creators can mint multiple types of tokens from a single Work NFT: dividend shares that distribute revenue proportionally, royalty tokens that capture specific usage fees, performance tokens that pay based on metrics, and governance tokens that provide voting rights on work modifications or licensing terms.

Investment Vehicle Creation

.ft containers transform individual work products into tradeable investment opportunities. A successful spreadsheet model, popular document template, or valuable dataset can be tokenized to raise capital for the creator while providing investors with exposure to digital work performance.

VALUE CREATION MECHANISM

Creator Capital Access

Creators can raise capital by selling tokens representing future revenue from their work. This enables pre-revenue financing for development projects, expansion capital for successful products, and liquidity for creators who want to realize value from their work without losing all future upside.

Investor Revenue Opportunities

Investors gain access to new asset class of digital work revenue streams. Returns are tied directly to work performance: usage fees, subscription revenue, licensing income, and derivative work royalties. This creates transparent, performance-based investment opportunities with clear underlying value drivers.

Market Liquidity & Discovery

Token containers create liquid secondary markets for creator investments. Investors can trade tokens based on work performance, market conditions, and portfolio needs. This liquidity attracts more capital to high-quality creators and enables efficient price discovery for digital work assets.

PLATFORM INVESTMENT OPPORTUNITY

Creator Economy Financialization

The global creator economy exceeds \$100 billion annually, but most creators lack access to sophisticated financing options. .ft Token Containers capture this opportunity by

providing infrastructure for creator securitization, enabling new forms of creative financing and investment.

Transaction Volume Scaling

Platform revenue grows with token trading volume, secondary market transactions, and new token issuances. As successful work products generate returns for early investors, market confidence and participation increase, driving exponential growth in transaction volume and platform revenue.

Financial Infrastructure Moat

Building comprehensive tokenization infrastructure requires significant technical expertise, regulatory compliance, and marketplace development. First-mover advantage in this space creates sustainable competitive moats through network effects, creator relationships, and investor trust.

TECHNICAL ARCHITECTURE

Token Container Structure

Component	Function	Implementation
Revenue Oracle	Tracks Work NFT performance & earnings	Blockchain-based data feed from NFT contracts
Token Smart Contract	Manages token supply, distribution, voting	BSV script with governance mechanisms
Distribution Engine	Calculates and distributes token payments	Automated revenue splitting algorithm
Trading Interface	Enables token buying, selling, transfer	DEX integration with order book
Governance System	Manages token holder voting and decisions	Weighted voting based on token holdings
Compliance Framework	Ensures securities law compliance	KYC/AML integration and reporting tools

Token Minting Process

1. Creator selects Work NFT for tokenization
2. Define token structure: dividend %, supply, governance rights
3. Set fundraising target and token price
4. Platform validates Work NFT performance and revenue history
5. Smart contract is created with specified terms
6. Tokens are minted and made available for investment
7. Revenue from Work NFT is automatically distributed to token holders
8. Secondary market enables token trading and price discovery

Token Types & Use Cases

Token Type	Structure	Use Case	Investor Returns
Dividend Shares	Profit sharing	Revenue-generating work	% of ongoing revenue
Royalty Tokens	Usage-based	High-traffic content	Fixed fee per use

Growth Tokens	Performance-based	Scaling projects	Returns tied to metrics
Governance Tokens	Voting rights	Collaborative work	Control + revenue share
Hybrid Tokens	Mixed structure	Complex projects	Multiple return streams

REVENUE MODEL & FINANCIAL PROJECTIONS

Platform Revenue Streams

Revenue Source	Rate/Fee	Description
Token Minting Fee	\$99 per token	One-time fee to create .ft container
Trading Commission	1.5% per trade	Fee on secondary market transactions
Management Fee	0.5% annually	Fee on assets under management
Premium Features	\$19.99/month	Advanced analytics, governance tools
Institutional Suite	\$499/month	Enterprise-grade compliance & reporting
White-label Licensing	\$10K setup + 2%	Custom tokenization platforms

Investment Examples & Returns

- Successful Spreadsheet Model: 1,000 tokens @ \$10 each = \$10K raised, 15% annual dividends
- Popular Document Template: 5,000 tokens @ \$5 each = \$25K raised, \$0.02 per use royalty
- High-Traffic Dataset: 2,500 tokens @ \$20 each = \$50K raised, 25% revenue sharing
- Collaborative Design Tool: 10,000 tokens @ \$2 each = \$20K raised, governance + 10% dividends
- Premium Research Report: 500 tokens @ \$100 each = \$50K raised, 40% revenue sharing

5-Year Financial Projections

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Active Token Containers	100	1K	5K	20K	75K
Total Tokens Minted	50K	500K	3M	15M	75M
Assets Under Management	\$500K	\$15M	\$150M	\$1.2B	\$8B
Trading Volume (Monthly)	\$50K	\$1M	\$25M	\$200M	\$1.5B

Platform Revenue	\$250K	\$3.5M	\$45M	\$275M	\$1.2B
Investor Distributions	\$100K	\$2.5M	\$35M	\$240M	\$1.6B

IMPLEMENTATION STRATEGY & ROADMAP

Phase 1: Infrastructure Development (Months 1-8)

- Build core tokenization smart contract infrastructure
- Develop revenue tracking and distribution systems
- Create basic trading interface and secondary market
- Target: 50 token containers, \$250K in assets under management

Phase 2: Market Development (Months 9-18)

- Launch comprehensive marketplace for token discovery
- Implement advanced governance and voting mechanisms
- Add institutional-grade compliance and reporting tools
- Target: 500 token containers, \$10M assets under management

Phase 3: Scale & Sophistication (Months 19-36)

- Develop complex financial instruments and derivatives
- Launch white-label tokenization platform for enterprises
- Integrate with traditional financial markets and custody
- Target: 5,000 token containers, \$150M assets under management

Phase 4: Market Leadership (Years 4-5)

- Establish platform as standard for creator tokenization
- Expand globally with localized compliance frameworks
- Develop API partnerships with major financial institutions
- Target: 75,000 token containers, \$8B assets under management

Regulatory Compliance Strategy

Securities Law Compliance

All .ft tokens are treated as securities and offered only to accredited investors or through appropriate regulatory exemptions. The platform maintains comprehensive KYC/AML procedures and provides necessary reporting to comply with applicable securities regulations.

International Expansion

Platform expansion follows regulatory approval in each jurisdiction, starting with crypto-friendly regions and gradually expanding to major markets as regulatory frameworks develop. Local partnerships ensure compliance with regional securities and financial services regulations.

Competitive Positioning & Market Impact

.ft Token Containers create an entirely new asset class by financializing digital work products. By Year 5, we project \$8 billion in assets under management, generating \$1.2 billion in annual platform revenue while distributing \$1.6 billion annually to investors in creator tokens.

Ecosystem Integration

.ft Token Containers build upon Save to Chain and Work NFT Containerization infrastructure, creating a comprehensive creator economy platform. This integrated approach provides multiple revenue streams while creating powerful network effects that accelerate adoption across all product categories.
